Implementing a Nursing Systems Framework

Additional Information

Funding

The funding for this research was provided by the Qatar Academic Health System, Health Services and Population Health Research Program. The aim of this program is to stimulate independent and high quality research in areas that affect the health of the population of Qatar.

Resources Accessibility

Access to the study protocol, the original data, and the programming code implemented to extract and integrate the data or the methodology that was followed to produce the final research dataset is available by request.

Author statement

AMC, IG and RG conceived the study. AMC, AF, BF, AT GB and RG developed and supported the implementation of the NSF. IG extracted and analysed the data. IG, RG and AMC wrote the first draft of the manuscript. All authors contributed to revising the paper and approved the final version.

Conflicts of interest

AC, BF, AT, GF, and RG were involved in the development of the Nursing Systems Framework that was evaluated in this study.
