

Table 2, Adjusted and unadjusted logistic regression for mortality and readmission

Model Variables		P-value	Odds Ratio	95% C.I. for EXP(B)	
				Lower	Upper
Mortality (adjusted)					
Age		.000	1.021	1.018	1.023
Event Priority		0.000	1.263	1.249	1.278
ICU Flag		.000	15.224	12.663	18.302
LOS Days		.032	.997	.993	1.000
Outcome		.001	.781	.679	.899
Readmissions (adjusted)					
Age		.000	.995	.993	.997
Event Priority		.742	1.003	.985	1.021
ICU Flag		.354	1.172	.838	1.641
LOS Days		.007	.991	.984	.998
Outcome		.001	.906	.852	.963
Unadjusted					
Mortality	Outcome	.000	.734	.649	.830
	Constant	0.000	.005		
Readmissions	Outcome	.002	.907	.854	.964
	Constant	0.000	.022
