Author contributions

RG, IG, AT, AMC, RW, RW and DT developed the idea for the study. RG was the principal investigator for the study. IG and ZM set up the databases. Data extraction was done by IG. ZM, RG and IG assessed the quality of the extracted data and did the analyses. RG, BF, AT, AMC, RW and DT contributed to interpretation of data. RG wrote the first draft of the paper. All authors contributed to the final manuscript. All authors approved the final version of the paper.

Acknowledgements

We would like to thank Paul Halliday and Akram Mostafa Ibraheem, Director of Health Information Management and HR ERP teams respectively for their contribution in providing access to the relevant data sources and their continuous commitment to excellence at Hamad Medical Corporation. Without their assistance, the particular research project would not have been possible.
